

W-Light

NEW FOR THE SEASON, W-LIGHT FURY 9" IS A FURIOUS ADDITION TO THE RANGE OF ROUND, POWERFUL AUXILIARY LIGHTS.

The futuristically designed, dark-toned lamp with two parking light color options offers a light output that is undeniably a wedge for the top fight. Superbly designed optics offer optimal light distribution on the road and a light performance of 1 lux up to 750 meters. As the icing on the cake, the new lamp has an integrated warning light neatly hidden in the upper part of the lens. The frameless design of the lens withstands shocks and bumps and does not collect dirt or snow. The mounting bracket is carefully designed so that the installation of adjacent lamps goes smoothly. W-Light Fury 9" is a lamp that attracts attention with its appearance, features and performance.

FURY 9"

W-LIGHT FURY 9" - 1605-NS3871

With warning light and amber / white parking light.
