V.003

CA-IVE 01

For IVECO IVE-Connect Radio

Features

Simple connection of a **AXION** camera
to the **IVECO IVE Connect** Radio

Operation:

Automatically turn on the camera:

When reverse gear is inserted, the radio switches automatically to the rearview camera.

Connections:

Red = reversing signal +12 / +24V DC

Attention:

When used with Axion shutter cameras (with motorized shutter such as DBC 114065S1 or DBC114067SHD) the red cable has to be connected to cl. 15 / ignition Plus + 24V.

Black = Ground

Green (short cable) = Mirror

(All Axion cameras are preset for reversing)

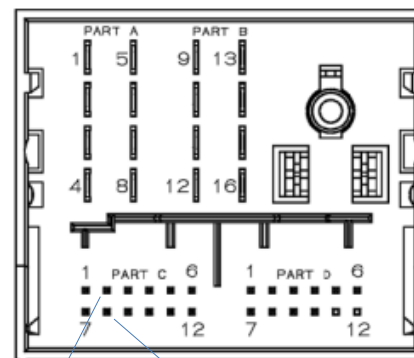

By connecting ground to the green cable, the camera image is mirrored.

Alternatively, the image can be mirrored by reacting the screw on the camera (see instructions for the camera).

Connection:

Pin in the pins into the predetermined slots of the connector plug.

Pin am Radio	Bezeichnung	Funktion
C-2	Yellow / camera +	Image signal +
C-8	Black / camera -	Image signal -

C-2 / yellow

C-8 / black

PS: The numbers are also on the contact strip of the female inserts.
