FREEDOM WARRANTY: PEACE OF MIND

The Freedom Warranty is our promise of long-term performance: a 5-year warranty on selected products from our premium, exclusively designed range. Developed as part of Strands Lighting Division's evolution, it reflects our passion for quality and products made to last.

- ✓ POSITION LIGHT
- ✓ TAIL LIGHT
- ✓ WORK LIGHT
- ✓ SIDE MARKER
- ✓ DRIVING LIGHT

COVERS ALL PRODUCT CATEGORIES

The Freedom warranty covers a wide range of products: from position lights to tail lights, driving lights to work lights, and everything in between. Visit strandseurope.com to discover all Freedom warranty products.

DURABLE MATERIALS AND DESIGN

Our products are designed to withstand the everyday challenges vehicles face: heavy rain, sun exposure, snow, road salt, vibrations, and extended use. High IP ratings, rugged housings, UV protection, and carefully chosen materials are not just marketing phrases. They provide measurable standards to ensure a long service life and, most importantly: peace of mind.

CUSTOMIZABLE LOGOTYPE

Do you want to showcase your company's logo? Now, you can order selected Freedom lights with your own name or logotype. All Freedom lights with the Strands deer logo can be customized to fit your unique brand. Contact your nearest Golden Shop retailer to find out more.

ADR APPROVED LIGHTS

ADR regulation concerns the transport of dangerous goods. Vehicles used for transporting hazardous materials must meet strict safety requirements, including the use of ADR-approved electrical and lighting components. ADR-approved lighting ensures compliance with regulations for vehicles operating in hazardous goods transportation.

Strands carries more than 50 different types of ADR-approved lights in our range. With these you can feel confident that you get the best performance, durability and safety from your lights, no matter where you drive.

INTELLIGENT LIGHTING

POWERED BY SKYN1

WHAT IS SKYN1?

Skyn1 brings all your lighting into one system. Connect your lights wirelessly, control them via app, button, or control, and get a solution where everything works together instantly. Choose the EXP wireless control or PXP relay box.

- ✓ ONE INTELLIGENT SYSTEM FOR ALL YOUR LIGHTS
- ✓ WIRELESS CONNECTION
- ✓ CONTROL WITH APP, BUTTON, OR WIRELESS CONTROL
- ✓ BLUETOOTH CONNECTION

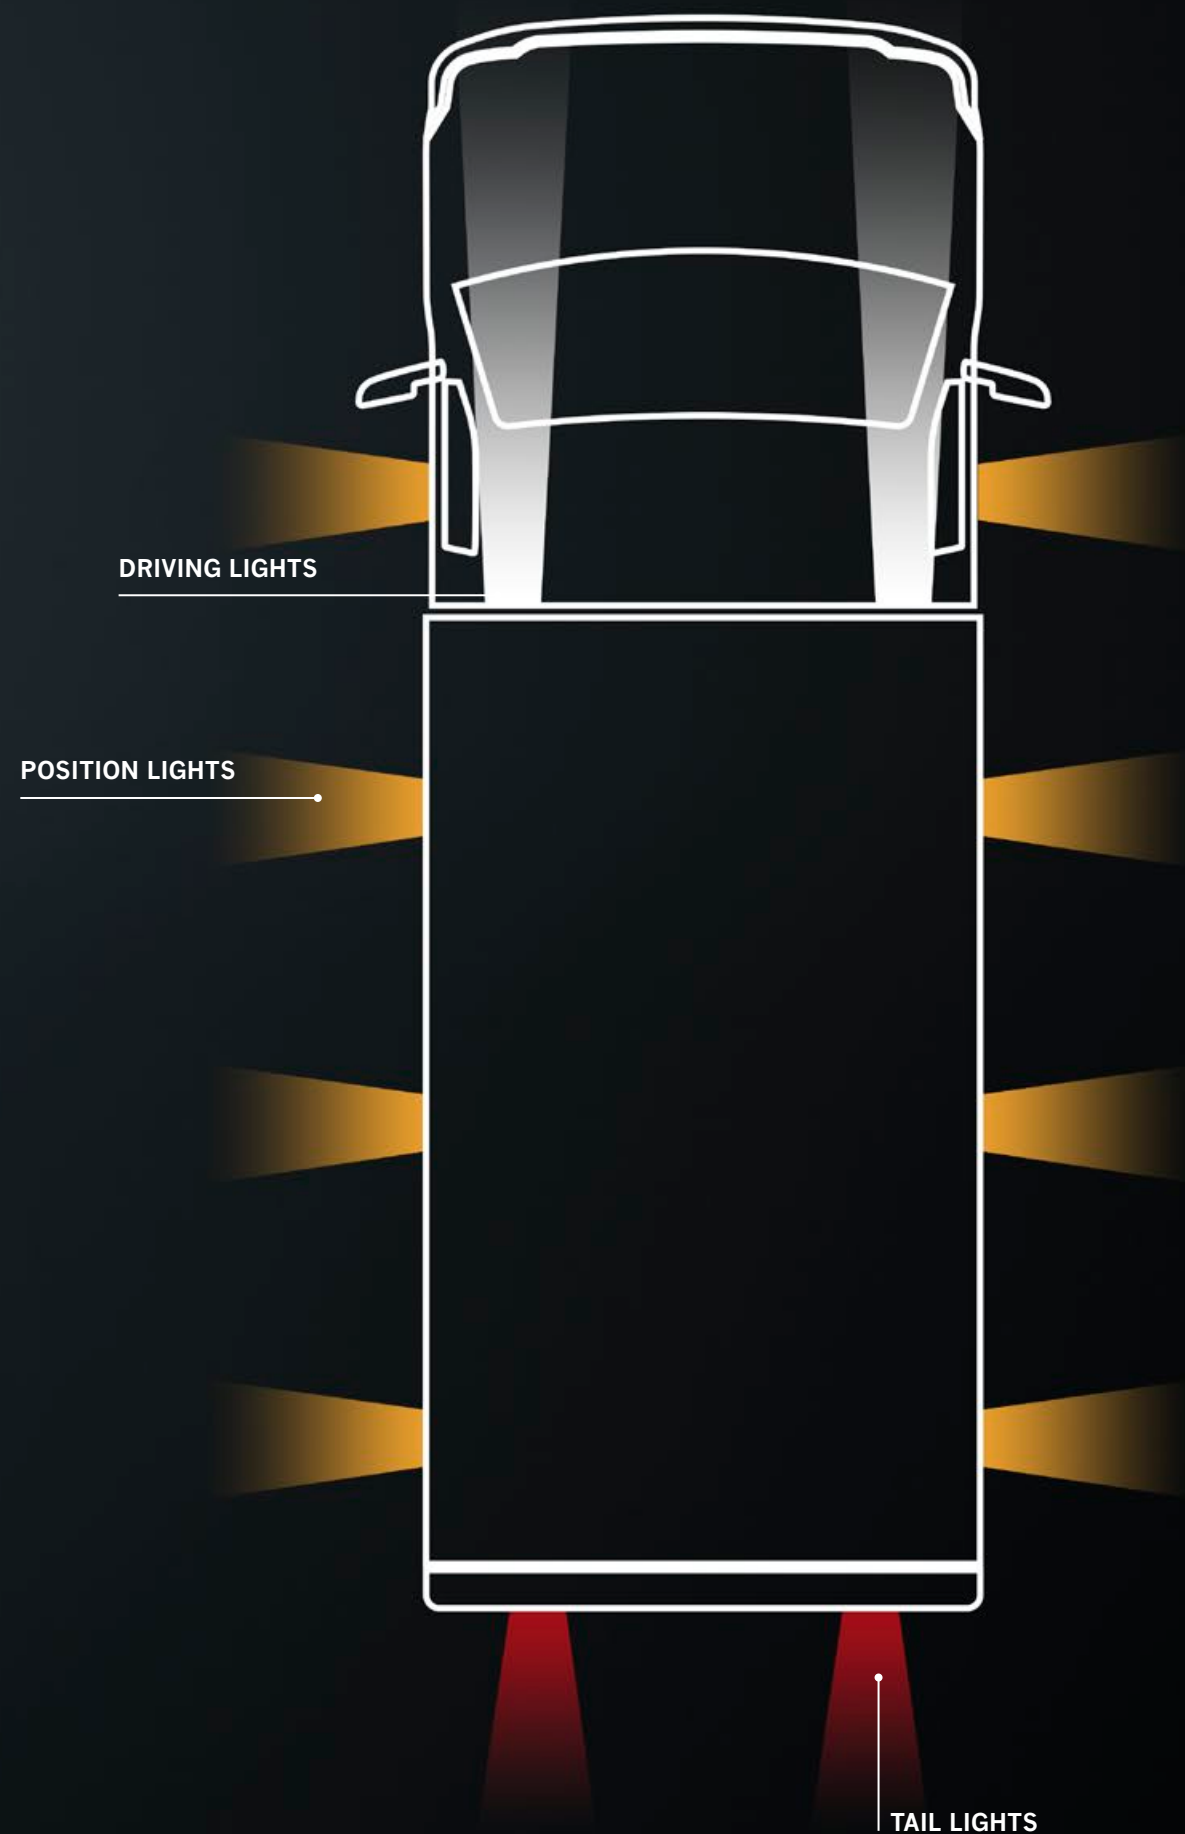

FROM COMPLEXITY TO COMPLETE CONTROL

A new way to control your lighting. Strands Skyn1 is an ecosystem where hardware and software work as one. Connect your lights to the PXP Force Box and quick buttons and get full control directly from your smartphone, fast and seamless. Or choose the EXP control box that automatically detects compatible Strands lights and assigns each function to dedicated buttons on the wireless control. Everything is synced, ready to use, and built to work together. One system, designed to move faster and work smarter.

FROM MANUAL TO AUTOMATIC INSTALLATION

Skyn1 transforms the installation process from manual and complex to seamless and intuitive. Instead of managing multiple switches and separate solutions, all lighting is brought together into a single system, giving you full control and a clear overview of every function. The result is a customized setup that unifies and synchronizes everything, ready to use from the moment it is connected.

SKYN1 CONTROLLER

SKYN1 EXP
Part No. 907851S1

EXP

WIRELESS AUTOMATIC CONNECTION

The EXP control is mandatory to control Skylord EXP lights. With the control, you can adjust lighting functions with a single click. One click for on/off, more clicks to change functions. Each button is preset for a specific type of light:

BUTTON 1

Driving lights and LED bars. Double-click to switch between XP/E-mode.

BUTTON 2

Position lights. Double click to change color.

CONNECT BUTTON

Connect the lights by pressing and holding the bound button and the correct light button. The lights have a memory function and will turn on to the latest setting.

BUTTON 3

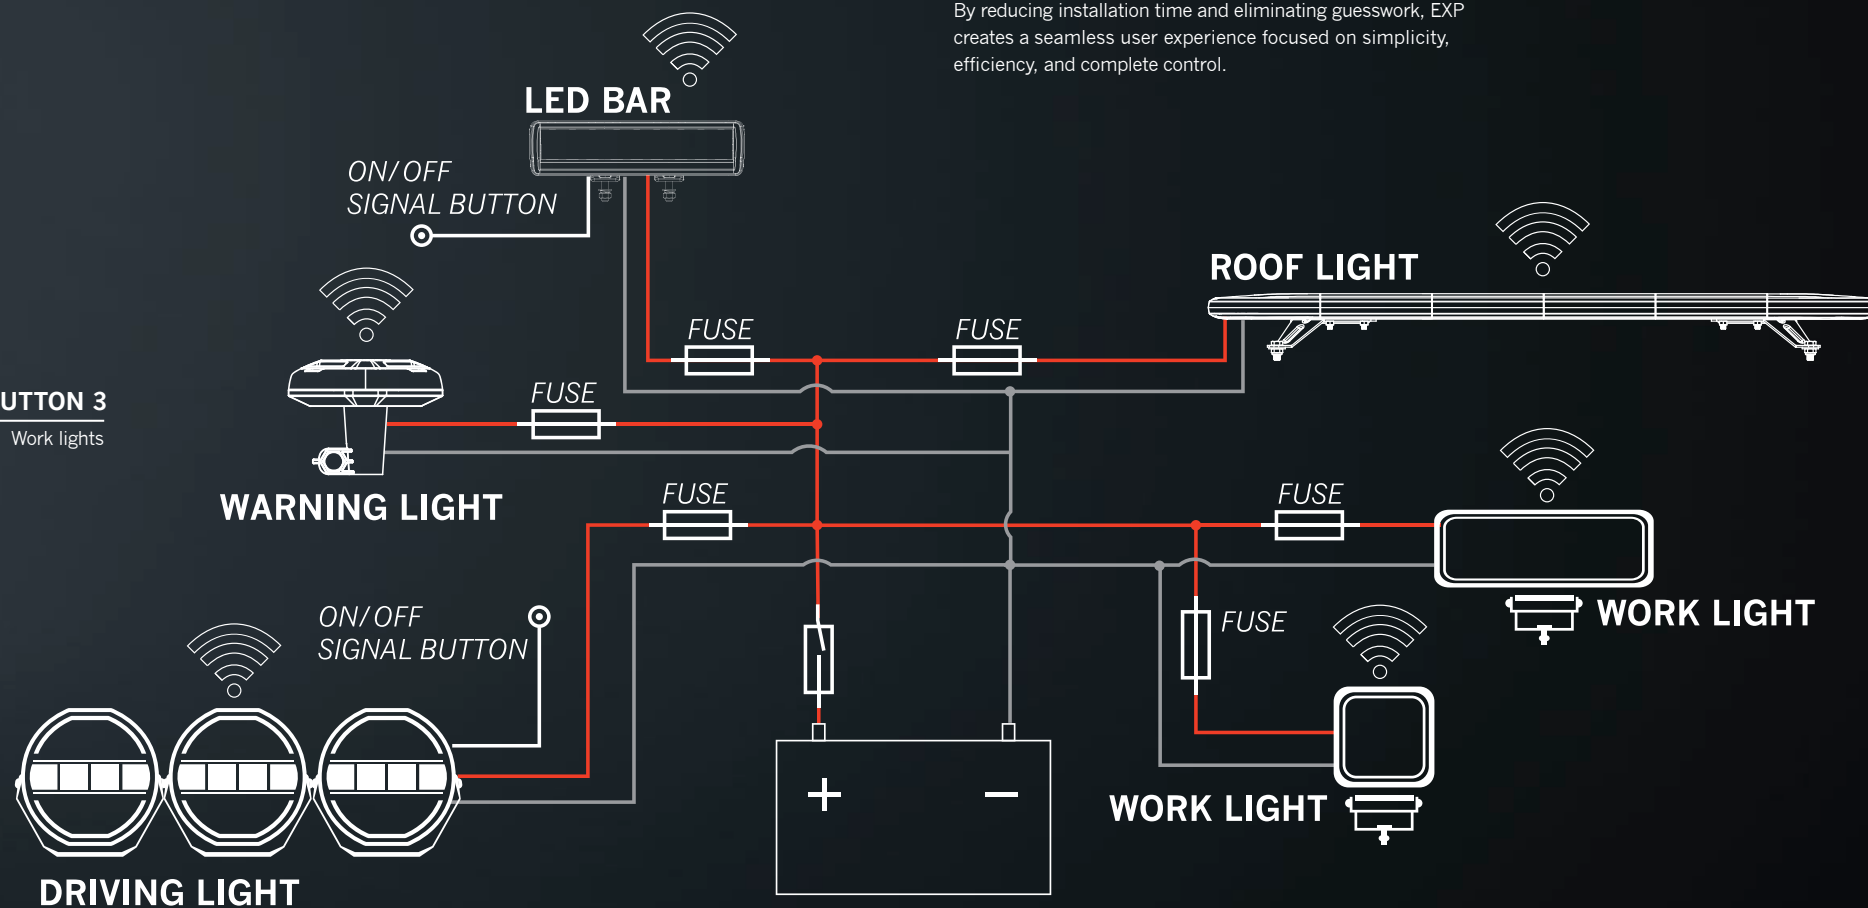

Work lights

BUTTON 4

Warning lights. Double-click to change patterns. Three clicks will engage cruise mode. Five clicks reset to the first pattern.

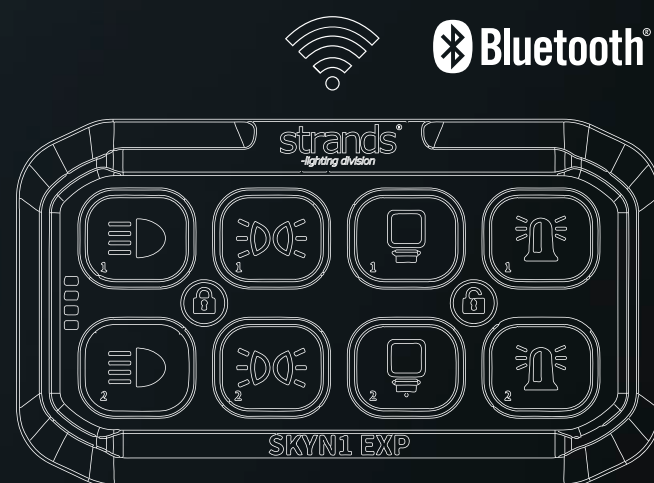

DISSCONNECT BUTTON

disconnect a light, press and hold the disconnect button together with the light button.

CONTROL ANY FUNCTION

The EXP control box features eight buttons that control up to 16 functions, giving users flexible control while keeping installation simple and efficient. EXP is ideal for standardized installations and any vehicles where speed and reliability matter. By reducing installation time and eliminating guesswork, EXP creates a seamless user experience focused on simplicity, efficiency, and complete control.

CONTROL ALL LIGHTS WITH ONE CONTROL

The EXP control features six buttons that control up to 12 functions, giving users flexible control while keeping installation simple and efficient. Only a positive and negative power connection is needed to get started, making EXP ideal for standardized installations, fleets, body builders, campers, 4x4 vehicles, and everyday work vehicles where speed and reliability matter.

SKYN1 CONTROLLER

SKYN1 EXP

Part No. 907851S1

EXP

- ✓ 600 MAH BATTERY
- ✓ RECHARGABLE
- ✓ MAGNETIC

WIRELESS CONTROL

The SKYN1 EXP is a wireless control compatible with Skylord EXP lights. It automatically connects to the lights via Bluetooth and assigns them to the right button on the control. All you need to do is connect the lamp to the battery, then press and hold the Connect and appropriate function button on the control. Fast, smart, and easy.

AUTOMATIC CONNECTION

BLUETOOTH CONNECTION

CUSTOMIZE MORE

The control has two rows of buttons. For example, you can connect the work lights on the vehicle's left side to the upper button, and the right side work lights to the lower button. Or have one button for LED bars and one for driving lights.

CUSTOMIZE YOUR SETUP

When using the control, you can change any light function: switching between XP and E-mode, changing position light color, switching warning light patterns, and more. The control has two rows of buttons. Making it possible, for example, to connect the work lights on the vehicle's left side to the upper button, and the right side work lights to the lower button.

BUILT-IN MEMORY

COMPATIBLE WITH SKYLORD EXP

CONTROL ALL LIGHTING FUNCTIONS

DESIGNED FOR CONTROL, DRIVEN BY PASSION.

This is the next step in Strands' passion journey. With Skyn1, we move you beyond individual products and into a complete system where everything works together. It's a smarter, more connected way to control vehicle lighting, built for today's and tomorrow's demands. This is where we're heading, toward solutions that give you wireless control, simpler installation, and a more seamless experience every time you step into your vehicle.

SKYLORD ROTATING BEACON

SKYN1 EXP

Part No. 905021S1-905022S1

- ✓ E-APPROVED
- ✓ CORROSION-FREE
- ✓ DAY AND NIGHT MODE
- ✓ USE WITH EXP CONTROL

DAY AND NIGHT MODE

Eight flash patterns, with dedicated day and night modes, ensure effective visibility whenever the situation demands it. The beacon can be connected with multiple units to create a complete warning light setup tailored to your vehicle and application.

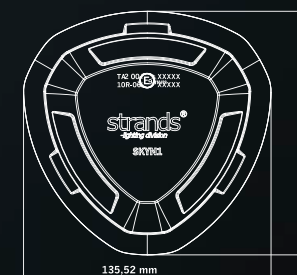

SURFACE AND POLE MOUNT

The EXP Warning Light Beacon is available in both pole- and surface-mount versions, giving you the flexibility to choose the installation that best suits your vehicle. The surface-mount model stands out with an innovative mounting solution that requires only a single mounting screw, compared to the three screws typically used on traditional beacons. The result is a cleaner installation, a sleeker appearance, and a modern design that complements the beacon's smooth, screw-free housing.

E-APPROVED

Approved for R65 Class 2, it provides the flexibility required for a wide range of professional uses. This beacon is EMC protected CISPR25 class 3, guaranteeing there will be no electrical disturbance.

SKYN1 APPLICATION

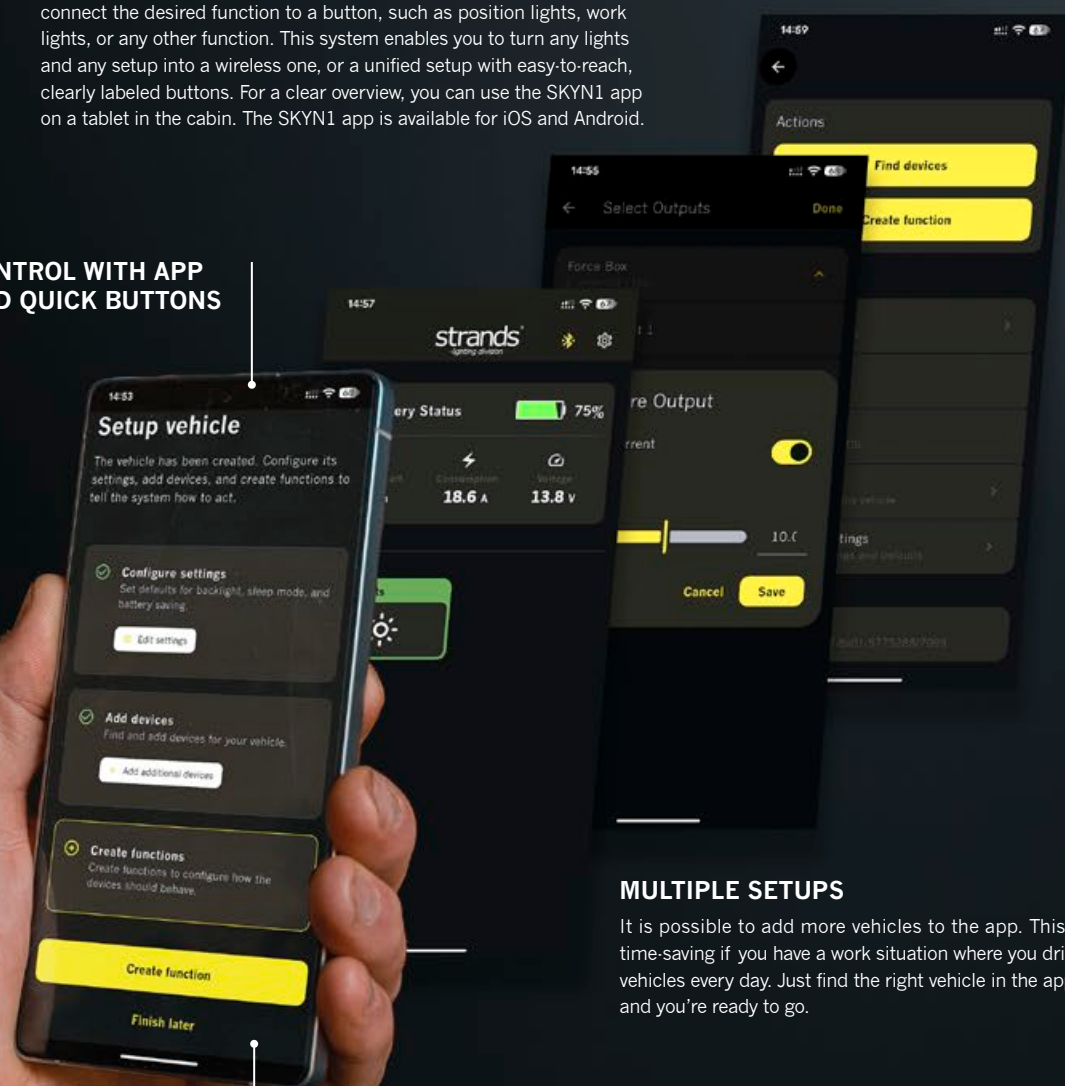

SKYN1 PXP

PXP

SKYN1 APP

The SKYN1 app is designed for use with the PXP Force Box and Buttons. Connect the lights you want to control to the Force Box. Open the app, add your vehicle, and connect to the Box and Buttons. In the app, connect the desired function to a button, such as position lights, work lights, or any other function. This system enables you to turn any lights and any setup into a wireless one, or a unified setup with easy-to-reach, clearly labeled buttons. For a clear overview, you can use the SKYN1 app on a tablet in the cabin. The SKYN1 app is available for iOS and Android.

CONTROL WITH APP AND QUICK BUTTONS

WORKS FOR APPLE AND ANDROID

MULTIPLE SETUPS

It is possible to add more vehicles to the app. This is very time-saving if you have a work situation where you drive different vehicles every day. Just find the right vehicle in the app, connect, and you're ready to go.

- ✓ CONTROL ANY LIGHT WIRELESSLY
- ✓ USE WITH SKYN1 APP
- ✓ QUICK BUTTONS

FORCE BOX
SKYN1 PXP
Part No. 907801

PXP: CONTROL ANY LIGHT WITH THE SKYN1 APP

The PXP Force Box is a relay box that lets you turn any light into a wireless light. Connect the lights to the Force Box, connect the box to the SKYN1 app, and you're ready to go. For quick access while driving or working, connect the Force Buttons and install them in the cabin. With these, you can control up to four lighting scenarios without using the app. You can connect multiple buttons to each setup and use multiple boxes.

CREATE THE PERFECT SETUP

The PXP Force Box supports 9–30V systems with four outputs, three signal inputs, and a total capacity of up to 60A. Users can freely create unlimited scenarios and control outputs through the app. Electronic fuses, programmable voltage guard, temperature monitoring, and automatic power-save mode ensure reliable operation in demanding environments.

FORCE BUTTON
SKYN1 PXP
Part No. 907802

PXP FORCE BUTTONS

The PXP combines the Skyn1 app, two quick buttons that control up to four functions, and the Force Box relay box. It is a powerful tool for advanced control, and you can install multiple Force Boxes and several buttons per box. The PXP Force box can be used with any lights.
