INTELLIGENT LIGHTING

POWERED BY SKYN1

- ✓ ONE INTELLIGENT SYSTEM FOR ALL YOUR LIGHTS
- ✓ WIRELESS CONNECTION
- ✓ CONTROL WITH APP, BUTTON, OR WIRELESS CONTROL
- ✓ BLUETOOTH CONNECTION

WHAT IS SKYN1?

Skyn1 brings all your lighting into one system. Connect your lights wirelessly, control them via app, button, or control, and get a solution where everything works together instantly. Choose the EXP wireless control or PXP relay box.

CONTROL WITH APP AND QUICK BUTTONS

WIRELESS AUTOMATIC CONNECTION

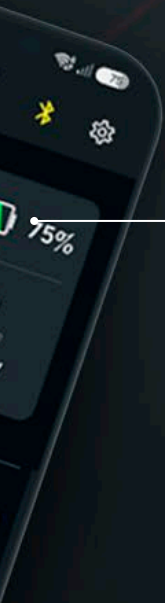

The EXP control is mandatory to control Skylord EXP lights. With the control, you can adjust lighting functions with a single click. One click for on/off, more clicks to change functions. Each button is preset for a specific type of light:

FROM COMPLEXITY TO COMPLETE CONTROL

A new way to control your lighting. Strands Skyn1 is an ecosystem where hardware and software work as one. Connect your lights to the PXP Force Box and quick buttons and get full control directly from your smartphone, fast and seamless. Or choose the EXP control box that automatically detects compatible Strands lights and assigns each function to dedicated buttons on the wireless control. Everything is synced, ready to use, and built to work together. One system, designed to move faster and work smarter.

FROM MANUAL TO AUTOMATIC INSTALLATION

Skyn1 transforms the installation process from manual and complex to seamless and intuitive. Instead of managing multiple switches and separate solutions, all lighting is brought together into a single system, giving you full control and a clear overview of every function. The result is a customized setup that unifies and synchronizes everything, ready to use from the moment it is connected.

CONTROL ANY FUNCTION

The EXP control box features eight buttons, giving users flexible control while keeping installation simple and efficient. EXP is ideal for standardized installations and any vehicles where speed and reliability matter. By reducing installation time and eliminating guesswork, EXP creates a seamless user experience focused on simplicity, efficiency, and complete control.

INTELLIGENT LIGHTING

With eight buttons, the EXP control provides complete command of all Skylord EXP lights and functions through a single compact unit. The controller is rechargeable via USB-C and features an integrated magnet on the back, allowing it to be stored wherever it is most convenient.

CONTROL ALL LIGHTS WITH ONE CONTROL

Only a positive and negative power connection is needed to get started, making EXP ideal for standardized installations, fleets, body builders, campers, 4x4 vehicles, and everyday work vehicles where speed and reliability matter.

SKYN1 APPLICATION

SKYN1 PXP

- ✓ CONTROL ANY LIGHT WIRELESSLY
- ✓ USE WITH SKYN1 APP
- ✓ QUICK BUTTONS

SKYN1 APP

The SKYN1 app is designed for use with the PXP Force Box and Buttons. Connect the lights you want to control to the Force Box. Open the app, add your vehicle, and connect to the Box and Buttons. In the app, connect the desired function to a button, such as position lights, work lights, or any other function. This system enables you to turn any lights and any setup into a wireless one, or a unified setup with easy-to-reach, clearly labeled buttons. For a clear overview, you can use the SKYN1 app on a tablet in the cabin. The SKYN1 app is available for iPhone and Android.

CONTROL WITH APP
AND QUICK BUTTONS

MULTIPLE SETUPS

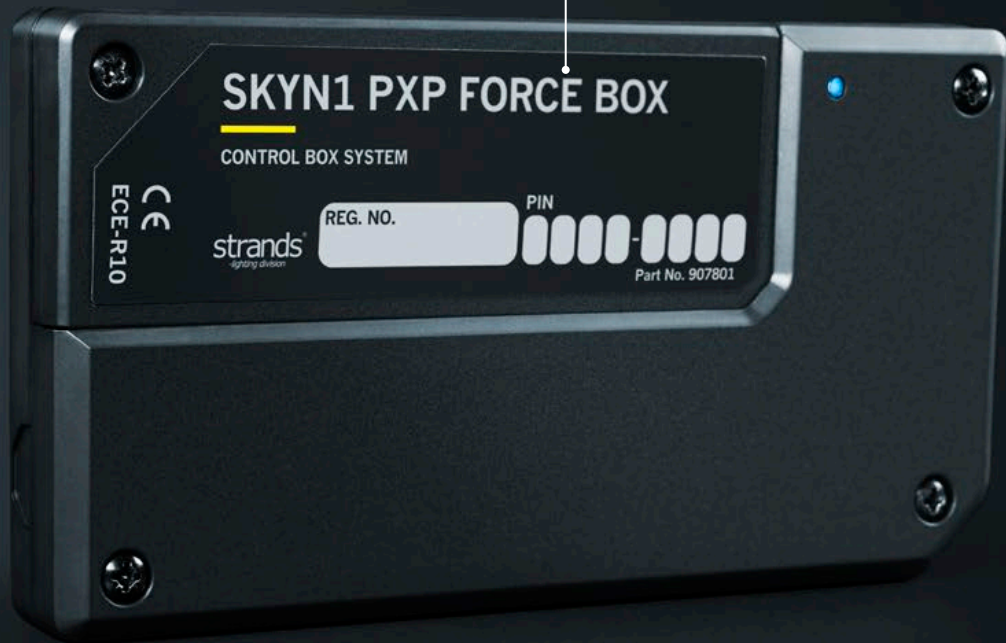

It is possible to add more vehicles to the app. This is very time-saving if you have a work situation where you drive different vehicles every day. Just find the right vehicle in the app, connect, and you're ready to go.

WORKS FOR IPHONE AND ANDROID

strands®
-lighting division

FORCE BOX
SKYN1 PXP
Part No. ST-907801

PXP: CONTROL ANY LIGHT WITH THE SKYN1 APP

The PXP Force Box is a relay box that lets you turn any light into a wireless light. Connect the lights to the Force Box, connect the box to the SKYN1 app, and you're ready to go. For quick access while driving or working, connect the Force Buttons and install them in the cabin. With these, you can control up to four lighting scenarios without using the app. You can connect multiple buttons to each setup and use multiple boxes.

CREATE THE PERFECT SETUP

The PXP Force Box supports 9–30V systems with four outputs, three signal inputs, and a total capacity of up to 60A. Users can freely create unlimited scenarios and control outputs through the app. Electronic fuses, programmable voltage guard, temperature monitoring, and automatic power-save mode ensure reliable operation in demanding environments.

FORCE BUTTON
SKYN1 PXP
Part No. ST-907802

PXP FORCE BUTTONS

The PXP combines the Skyn1 app, two quick buttons, and the Force Box relay box. It is a powerful tool for advanced control, and you can install multiple Force Boxes and several buttons per box. The PXP Force box can be used with any lights.

BIG ENERGY RAW

DRIVING LIGHT

Part No. ST-901035 (9")

- ✓ 1 LUX @ + 1000 M
- ✓ 13 000 ACTUAL LUMENS
- ✓ IP69K

1 LUX @ 1000 M

In Xperience mode, Big Energy RAW delivers more than 13,000 actual lumens, reaching over 1 km @ 1 lux. The 5700 K color temperature produces a strong, clear beam pattern. With an IP69K rating and a 3-year warranty, Big Energy RAW is a driving light designed to perform year after year.

Use the QR code to check out the product.

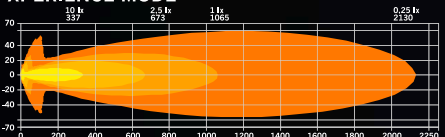

PURE PERFORMANCE

Big Energy RAW gives you exactly what you need: powerful performance, straightforward installation, and a driving light built to last. With E-approved and Xperience mode, it's easy to adapt the light output to different driving conditions. Two Big Energy RAW lens covers are available in yellow and transparent versions (Part No. ST-901036-37). Both help protect the lens, while the yellow cover softens the light output and can reduce glare in rain and snow.

WHITE AND AMBER POSITION LIGHT

E-MODE AND XPERIENCE MODE

The Big Energy 2.0 driving lights feature both the Xperience boost mode and the E-approved E-mode. This gives you the opportunity to adapt the light to different weather situations and to driving in different countries.

DT-4 CONNECTOR

Big Energy 2.0 has white and amber position lights, and is a good fit for both heavier and lighter vehicles. Connection is done with a DT4 connector. It is IP-rated IP69K, made from durable materials, and covered by Strands' 3-year warranty.

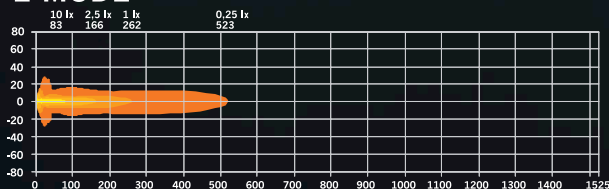

MAXIMUM POWER IN EVERY SIZE

Big Energy 2.0 is a great entry into high performance driving lights, giving you a clear introduction to what a driving light can do for your driving experience. With its 12,900 actual lumens and a 700 meter range in Xperience mode, this 9" driving light packs a real punch.

NEXT GENERATIONS WORK LIGHT SKYLORD

QB

WORK LIGHT

Part No. ST-906011

Use the QR code to
check out the product.

- ✓ 3500 LUMEN
- ✓ CORROSION-FREE
- ✓ IP69K

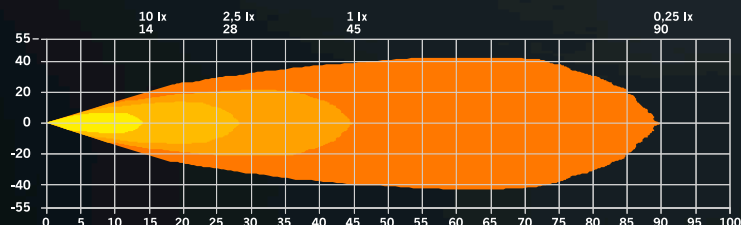

CORROSION-FREE MATERIALS

Durable, hard-wearing, and corrosion-free. The thermal plastic housings are selected to withstand salt, dirt, water, and above all: corrosion. The Skylord QB and Duo are IP-rated IP69K for maximum resistance to water and dirt.

3500 ACTUAL LUMENS

The QB features a wide and powerful beam pattern suitable for most work environments. With 3500 actual lumens, it reaches 1 lux @ 45 meters. The 5700 K color temperature provides a strong and clear light output. The QB is compatible with 10–32 V systems.

550 MM CABLE

DT-2 PIN
CONNECTION

EASY INSTALLATION

The compact yet sturdy design of the Skylord QB makes installation simple. The light is supplied with a DT2-PIN connector, screws, nuts, and washers. A rubber pad is also included and is fitted between the bracket and the vehicle surface. This pad helps protect both the light and the mounting surface against corrosion and vibrations.
